The products as listed above contain no substance(s) listed on the REACH Candidate List.

SECTION 5 : California Proposition 65

Specific product codes for the product families as listed above contain nickel, a chemical known to the State of California to cause cancer. Product labeling identifies the precautions associated with the material proposition 65 warning. Immediately remove the orthodontic appliance and instruct the patient to seek medical care in an allergic reaction.

SECTION 6 : Latex Statement

The latex Elastics contain natural rubber latex tubing. Latex is a known allergy and the product is labeled as containing latex per ISO 15223-1.

SECTION 7 : Magnetic Resonance (MR) Safety

The RMO Orthodontics products that are metal have been assessed for Magnetic Resonance (MR) safety with results shown in the table above for the applicable products. The products are not labeled with the MRI Hazard per ASTM F2503-20 as the labeling for orthodontic devices will never be observed by radiologists in charge of MRI. The probability of orthodontic hardware-related incidents during MRI is low as all radiologists are familiar with necessary precautions and there have been no reportable events in the past 20+ years.

SECTION 8 : Nut and Gluten Ingredients

The non-chemical RMO Orthodontics products are not formulated with any nut or gluten containing ingredients. The manufacturing site of the products does not manufacture or process nut or gluten containing products.
