

A Cleaner Mouth An Awesome Smile

ORTHOFOAM™ BRACES CLEANER

EverSmile OrthoFoam™ and WhiteFoam™

OrthoFoam™ is fun to use, so kids are more likely to brush.

This whitener is safe for braces and can be used as an add-on brushing booster, foaming rinse, or a dental tray cleaner and teeth whitener.

OrthoFoam™'s bubbles get under wires and brackets where brush bristles can't reach.

Within one week of consistent use, you can see a reduction in plaque buildup and improved gingival health.

The hydrogen peroxide-based formula whitens under brackets so that tooth whitening can begin during treatment.

99.999% of bacteria is killed within 60 seconds, preventing decalcification lesions and white spots. dental appliances

Compatibility

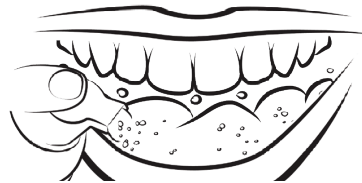

Metal braces
Ceramic braces
All fixed appliances and wires

Item #: J03550

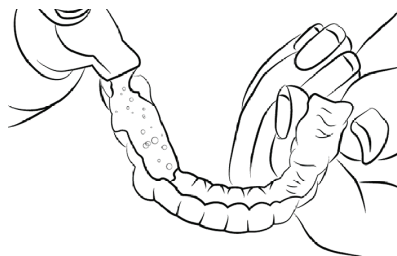

OPTION 1

A Cleaner Mouth An Awesome Smile

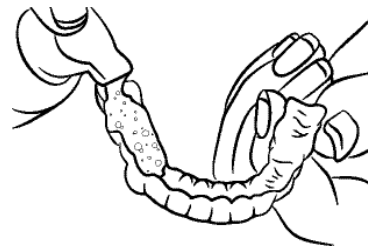

ALIGNER & RETAINER CLEANER

AlignerFresh Original Clean

Clean anywhere, anytime

It's a wearable aligner cleaner, which means cleaning your aligners won't take away from time spent wearing them. AlignerFresh Original Clean gives you a complete clean, without waiting for soaks or carrying around a toothbrush.

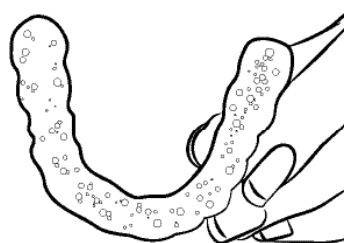

STEP 1

Remove your trays and dispense up to a full pump of foam inside each tray.

Whiten while you straighten

AlignerFresh Original Clean uses a low dose of hydrogen peroxide meaning you can use it daily. The foam works both under and over attachments so you won't be left with tooth discoloration after your attachments are removed.

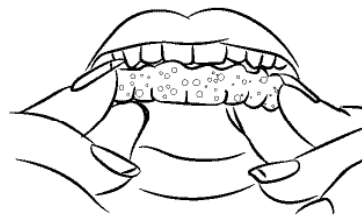

STEP 2

Spread the foam evenly using the nozzle tip to cover and clean all areas.

Prevent yellow cloudy trays

Aligners start to get funky and discolored as soon as you put them in your mouth. AlignerFresh Original Clean removes build-up in your trays, plaque on your teeth, and prevents yellowing so your aligners and attachments remain undetectable.

STEP 3

Pop your trays back in your mouth, spit out any excess, and let the foam naturally dissipate. No need to rinse.

Freshen your breath and trays

AlignerFresh Original Clean effectively removes buildup in your aligners and kills 99.999% of bacteria. Mint oil eliminates bad breath and leaves your mouth feeling fresh and clean, so you can smile with confidence.
